

Cleaner Production Strategies in Rwanda

Cleaner Production and Climate Innovation Centre (CPCIC)

Promoting Sustainable Production & Climate Innovation

Official CPCIC Publication

1. Introduction

The Cleaner Production and Climate Innovation Centre (CPCIC) plays a key role in supporting Rwanda’s transition towards sustainable industrial development. This publication presents strategies that promote resource efficiency, waste reduction, and climate-resilient innovation.

2. Cleaner Production Approach

Cleaner production focuses on preventive environmental strategies applied to processes, products, and services. CPCIC supports industries to minimize pollution while improving economic performance and social responsibility.

3. Climate Innovation & Green Growth

Climate innovation involves adopting technologies and practices that reduce greenhouse gas emissions and enhance resilience. CPCIC promotes renewable energy, sustainable manufacturing, and circular economy models.

Focus Area	CPCIC Contribution
Industry	Cleaner technologies & efficiency audits
Energy	Renewable energy integration
Environment	Waste reduction & recycling
Policy	Technical advice & capacity building

4. Conclusion

Through cleaner production and climate innovation, CPCIC contributes to Rwanda’s sustainable development goals. Collaboration between industries, government, and research institutions is essential for long-term environmental and economic benefits.
